Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere?
[Import a repository.](#)

Owner

Repository name *

 camilo-val

 /

evind 

Great repository names are short and memorable. Need inspiration? How about [supreme-happiness?](#)

Description (optional)

 **Public**

Anyone can see this repository. You choose who can commit.

 **Private**

You choose who can see and commit to this repository.

Skip this step if you're importing an existing repository.

☐ **Initialize this repository with a README**

This will let you immediately clone the repository to your computer.

Add .gitignore: **None**

Add a license: **None** 

Create repository

ACTUALIZAMOS GITHUB

The screenshot shows a web browser window displaying a GitHub repository page for 'camilo-val / evid'. The browser's address bar shows the URL 'https://github.com/camilo-val/evid'. The repository page includes a header with the repository name, a 'Code' button, and statistics for 'Unwatch', 'Star', and 'Fork'. Below the header, there are tabs for 'Code', 'Issues', 'Pull requests', 'Projects', 'Wiki', 'Security', 'Insights', and 'Settings'. The main content area shows the repository's description, a table of commits, and a button to 'Add a README'.
